

## Protect Your Family

Do you know that it's a mighty safe business policy to lay by a little for a rainy day? The best investment you can possibly make is to take out a policy in

## The Northwestern Mutual Life Insurance Co.

Either straight life or endowment. You are then laying up a little all the time, and besides you have the assurance that should anything happen to you, your wife and babies, mother or sweetheart, as the case may be, will be left with an estate for their care and protection.

Don't put it off. Right now is the safe time. See about a policy before it is too late.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

## A Self-Cleaning Conveyor

We are wondering if our customers fully appreciate what real quality is built into the PAW PAW SPECIAL Spreader by the use of the OPEN-DOOR, or SELF-CLEANING conveyor. You know the trials and troubles that come from the clogging of a conveyor under a manure spreader, the fouling of the slats and the general objections of this character as found in many machines.

In Our Spreader we have entirely over-come objections of this kind by having each section of the conveyor hinged at one edge so, as it passes back under the machine, it swings wide open and lets all accumulation fall freely to the ground. There is no clogging of this machine in the winter time, no matter how much it freezes up. There are none of the fouling troubles that come with other endless conveyors. This is one of the vital parts of a manure spreader.

This Kind of a conveyor is expensive to build, but that is not the only reason why it is found on no other machine. It is covered by basic patents and is made only by the company building our Spreaders for us.

Come in and let us show you what it is and how it turns the trick. We are waiting for your call.
